Kycon Vertical Surface Mount Modular Jacks expansion

Morgan Hill, CA – Kycon now offers a shielded version of their vertical modular jack product line that provides more options for design solutions. The GTVX vertical surface mount jack series is now available with or without a shield and can be used in a variety of applications such as networking, telecomm, consumer products, office and home equipment. The low profile SMT design is suitable for PC add-on board applications.

The non-shielded version is available with 4, 6, and 8 pins and the newly available shielded version is available with 8 and 10 pins. All have standard gold flash plating on the contact area with an option of 50u available. Standard packaging is tray but tape and reel may be available upon request. All part numbers are RoHS and REACH compliant.

Please contact Kycon for pricing information.
