Kycon Adds Middle Mount Stereo Jacks

San Jose, CA – Kycon now offers a mid-mount stereo jack option – the STX-35398 series – expanding its already extensive line of stereo jacks, which includes surface mount and through-hole options. The STX-35398 series mid-mount option adds more flexibility to board mount designs to applications that are continuously requiring smaller, lower profile, and higher functions such as portable audio equipment, mobile phones and smartphones.

The STX-35398 Series complies with EIA standards and is available as a 3.5mm diameter opening, 3-pole with one open switch and 5 pins. The series offers two styles:

- STX-35398A-5N-TR - Mid-Mount with through-hole and surface mount contacts with barrel
- STX-35398E-5N-TR - Mid-Mount with through-hole contacts without barrel

In 2009, Kycon, Inc. was named the **#1** connector company in overall product quality, delivery reliability, sales support, customer service function, and website usability by Bishop and Associates, a connector industry consulting firm. Kycon is committed to excellence in products and service; continually broadening their product line (including customized solutions) maintaining clear focus on quality, while upholding world-class service and support that has consistently earned them Bishop's top-rankings for customer satisfaction.
