Kycon Introduces HDMI™ Connectors

San Jose, CA – Kycon presents the KDMIX series—a new series of HDMI™ (High Definition Multimedia Interface) connectors that will provide the next generation interface for end consumer products such as digital televisions, set-top boxes, and DVD players.

The HDMI™ specification was developed to meet the explosive demand for high definition audio and video by having it handle high bandwidth to support high-definition video and multi-channel digital in a single cable.

The KDMIX series, which has been tested to the HDMI™ 1.3 specification, includes a surface mount 19-pin connector that is available with or without a panel-mounting flange. The series is also available as a surface mount or through hole shield tabs. The connectors are fully shielded for ESD protection and are all RoHS compliant.

Kycon continues to offer a complete quality connector product line, including customized solutions, while maintaining world-class services and support that has consistently earned them Bishop's top-rankings for customer satisfaction.
